In today's Vatnik Soup, I'll introduce how the Elon's Election Interference Machine™ (EIM) works. Since Musk & his brologarch allies won the presidency for Trump, they've now harnessed the machine to interfere in European elections, including the ones in Germany & Romania.

1/23

At this point it is clear why Elon bought Twitter – his grand plan was to promote “free speech absolutism” (which, of course, doesn't even exist on the platform) and tweak the algorithms so that they allow him to promote political parties that align with his worldview.

First, let's talk about "freedom of speech" that the Trump administration, especially Musk and VP Vance constantly rant about. Incidentally, they only blame the EU for "limiting free speech", and there's a good reason for this: they are driving for political change.

Most of Musk's more than 160 posts about USAID have been responses to a handful of small but influential verified accounts, many of them using pseudonyms. The most popular – including posts from Wall Street Apes, **Kanekoa the Great**, Chief Nerd and Autism Capital – have been viewed hundreds of millions of times, amplified by Musk and his 216 million followers, according to X metrics. As the theories spread, they are repackaged, and in many cases added upon, to further the claims.

A review of the accounts' profiles reveals how a lengthy crusade to paint USAID as a malevolent force built up in recent years in relatively fringe internet circles, only to be suddenly elevated and acted upon by Musk. The pattern is similar to one that played out with the so-called [Twitter Files in 2022](#), when selectively framed narratives and out-of-context internal documents were weaponized to fuel allegations of a grand government censorship conspiracy. And it is one likely to continue under Trump and Musk, who have histories of trafficking in falsehoods.

...by re-tweeting them and commenting on their posts. This massive increase of income has also been evident with Elon's love interests, who have reported monthly payments of up to 20,000 USD. In other words, EIM can provide its targets both visibility and money.

EIM also aims to make X extremely biased, and focuses on promoting and growing those accounts that support the Trump administration and Elon's DOGE. The "freedom of speech absolutist" Musk isn't afraid to silence and censor accounts that speak against his actions.

Musk is ready and willing to use censorship when the requests come from countries like Turkey and India. He's removed a BBC documentary about India's Modi, and banned accounts of critical journalists in India. Elon also enabled censorship before the elections in Turkey.

By growing and promoting pro-Trump accounts, EIM “collects” large social media superspreader accounts that then fully support Trump’s and Musk’s policies. Because these accounts quickly garner a large following, they are also promoted to any new user joining the platform.

This way Elon has created a very effective echo chamber, where dissenting voices are present but rarely heard. By removing academic's access to analytics tools and hiding likes, any kind of manipulation and inorganic activity is extremely difficult to detect.

And now that the Trump administration seems to have allied with Russia, the two can cooperate and perform massive-scale influence operations that use both automated systems and large social media accounts to promote pro-US/pro-Russia messages.

A politician from the Alternative for Germany party, Alice Weidel, who is also a candidate for German chancellor, expressed confidence that the policy of anti-Russian restrictions harms Berlin itself. That is why Weidel plans to "end the policy of sanctions" against Russia and establish "very good relations" with Moscow.

Exclusive: Far-right German parliamentary aide tasked by Russia with stopping Leopard tanks to Ukraine

4 August 2023

Leaked communications between Vladimir Sergienko, a naturalized German citizen, and "Alexei," a suspected FSB operative, show the extent of Russia's infiltration of the Alternative for Germany party. Their "active measures" included a plan to stop or slow delivery of German main battle tanks to Ukraine using frivolous litigation against the German government. It would only cost \$93,000.

It's now safe to say that Trump administration's goals align with AfD's, otherwise both Musk and Vance wouldn't be pushing for their victory so aggressively. Germany is the biggest

economy in Europe so it would be beneficial to have them along in this unholy alliance.
